

Fidim Portfolio Project

Backend Meeting

Technology:

- Nodejs
 - If frontend is React, the handshake to the backend will be easier
- MongoDB
 - Easy to use
 - Don't have to structure fields
 - Code focused
 - Store profile photos easily

Procedure:

- Backend will make 3 views:
 - Get all profiles
 - Get one profile
 - List of all profile objects

Next Steps:

- David will make assignments to Zynkah and Peter in clickup and branches in github
- Some diagrams will be posted in the backend channel for help
